

immixGroup

Available at no additional charge for clients of immixGroup's Contract Management division.

The WebLink Service from immixGroup is a unique service for those clients for whom we manage a Multiple Award Schedule.

WebLink Service eliminates the need for your company to establish separate, costly, time-sensitive and error-prone processes for complying with contract requirements. WebLink gives government agencies the current and accurate information they need (and that you want them to know) about your GSA Schedule. It is immixGroup's goal to make the WebLink Service a perfect fit with your company's e-commerce solution for the federal market.

As a first-step technology solution for immixGroup clients, WebLink Service takes full advantage of the current GSA initiatives aimed at providing a single source of Internet access to ordering agencies.

WebLink will allow your company to:

-  Eliminate the costly printing and distribution of your pricelist.
-  Provide online review and download printing of your pricelist.
-  Provide easy access to pricelists from your corporate web site or from *GSAAdvantage!*
-  Have immixGroup maintain all online pricelist information as part of our contract management services. Eliminate outdated pricelists for sales channels and customers.
-  Provide easy access for potential government buyers to obtain additional information about your company and its products from *GSAAdvantage!*

Contact your immixGroup Account Manager for additional information and to coordinate the activation of this new service for your company.
