Blue Prism invented Robotic Process Automation (RPA) to provide an alternative sourcing option to human labor and outsourcing. As the leading RPA software provider, Blue Prism makes government agencies’ business operations more agile and cost-effective by augmenting their human workforce with a “digital workforce” of software robots. Accredited Blue Prism partners or the agencies’ operational teams implement the digital workforce. The robots are managed by the agencies business teams and governed by IT, enabling employees to focus on higher-value work, while autonomous multi-skilled software robots tirelessly perform error-free rules based administrative transactions. Whether for mission delivery, citizen engagement, work-force realignment or back-office functions, Blue Prism can enable governments to transform business processes, reduce costs, and improve citizen experience and overall
workforce satisfaction. Blue Prism offers Centralized Management to ensure absolute policy compliance, scalability and IT approval. Blue Prism is not cumbersome like IT built automation, it is flexible and easy to use. Our tenets are:

Scalability - You can instantly deploy one, several or all resilient robots to scale on-demand
Resilience - Create an inventory of re-useable robotic objects and processes to deploy as needed.
Compliance - Ensure absolute policy compliance with proven security, scalability & IT approval.
Security - Avoid fraud with the robust RPA solution used by the world’s most secure financial institutions.

Only Blue Prism offers a flexible, proven Government RPA solution that is easy to use, works with virtually any application across heterogeneous environments and meets the strict compliance guidelines of IT governance.

Multivista provides thousands of readily available inspection-grade digital photographs of your
construction project that are indexed to the architectural drawings by date and location. During construction, we provide a fundamental web-based collaboration tool to assure timely information sharing, quality installations, trade accountability and efficient reporting and documentation. After construction, we provide the most accurate, accessible and easily navigated permanent record available for your facility managers and for future expansion, maintenance and modification.

2211 E. Camelback Road, Suite 202, Phoenix, AZ 85016, http://www.multivista.com

NetAlly offers testing you can trust, from a new ally. Our platform and family of network test solutions have been helping network engineers and technicians better deploy, manage, and maintain today’s complex wired and wireless networks for decades. Previously a division of NETSCOUT.

Since 1993, we have been an ally of network professionals worldwide. We began by making the world’s first handheld network analyzer, and have continued as industry pacesetters ever since, first as Fluke Networks® then NETSCOUT®. Now, as an independent organization owned by private investment company StoneCalibre, NetAlly continues to set the standard for portable network testing. We are a company founded by engineers, passionate about innovation, and motivated by one purpose: to create the best test equipment possible, designed with your success in mind.

Our leading-edge tools work hard to get the job done fast by...

Simplifying the complexities of networks. Providing instant visibility for efficient problem solving. Enabling seamless collaboration between site personnel and remote experts.

Your organization relies on you to keep their networks running. And just like you, we are reliable, practical, no-nonsense experts. We are your behind the scenes partner.

NETSCOUT Systems, Inc. is a leading provider of business assurance – a powerful combination of service assurance, cybersecurity, and business intelligence solutions – for today’s demanding service provider, enterprise and government networks. NETSCOUT Solutions help identify performance issues and provide insight into network-based security threats for Federal, State and Local government agencies.

Purchases of NETSCOUT products and services off the GSA schedule that are made through resellers, must be through NETSCOUT Authorized Government Resellers. Related inquiries should be directed to EC America, Inc.

310 Littleton Road, Westford, MA 01886-4105, http://www.netscout.com

Nexenta is the market creator and leader in Open Software-Defined Storage (OpenSDS) software solutions for Hybrid and Multi Cloud enterprise environments via Nexenta AnyCloud vision; with nearly 6,000 customers, 300 partners, 50 patents, and more than 2,000 petabytes of storage capacity under management; disrupting and democratizing one of the largest and most oligopolistic IT market segments nearing $100B in size by 2020. Nexenta uniquely integrates its hardware-agnostic software-only enterprise OpenSDS innovation with deep “open source” collaboration via some of the most active communities with 45,000+ members.
Nexenta enables a wide variety of workloads from legacy enterprise to next-gen cloud-native apps, on any cloud platform, any protocol and any hardware infrastructure to power the largest and most cost/performant data centers globally. Nexenta OpenSDS solution portfolio is 100% software-based for both on and off premise settings. Nexenta provides organizations with Total Freedom protecting them against punitive legacy storage hardware vendor practices including, long term “vendor-lock-in”, “vendor-bait-n-switch”, and “vendor-rip-n-replace.” Beyond its industry-leading software innovation and multi-channel distribution, Nexenta also provides comprehensive enterprise-class support and services 24x7, globally.

NNCompass is a single-pane-of-glass ETL, digital process automation (DPA) and data preparation platform for both structured and unstructured data. NNCompass implements a multi-layered approach to digital automation and data enrichment to achieve true intelligent automation. We begin with the data, both structured and unstructured, and apply machine learning and artificial intelligence technologies to produce usable, scalable and highly efficient information that fuels process automation, business analytics and data visualization.

At its core, NNCompass is AI-enabled ETL and DPA software focused on automating the application of structure to unstructured data (like PDF forms, health records, emails and government message types) and integrating it with structured data. It includes built-in components to ingest, transform, prep, integrate and stream both structured and unstructured data.

NNCompass acts as the bridge between data sources (on-prem or cloud) and multi-cloud AI/ML services, like Amazon Comprehend, Comprehend Medical, Textract and Translate. We automate the utilization of these offerings, so you don’t have to write any code, and get immediate feedback on how well each service is enriching the data.

NNCompass transforms unstructured data into highly structured, AI/ML-ready data through application of machine learning and document understanding techniques. NNCompass Government implements custom processing, parsing and streaming code to handle some of the most difficult government message types, data formats and security tagging environments and acts as the mesh between your data sources (on-prem or cloud) and multi-cloud AI services for classified compute loads.

We hold ourselves to a higher standard, both in the products we deliver and in the way we conduct ourselves throughout the entire customer experience. Because, after all, we are in the business of securing a great deal more than just our place in the market.

Our mission is to be at the forefront of technology and innovation, delivering superior capability in tandem with maximized cost efficiencies. The security solutions we provide help secure freedoms for our nation as well as those of our allies. Squarely meeting our obligations, fiscally and technologically, isn’t just a business goal, but a moral imperative. To that end, as we evolve as a company, the responsibility we feel for our country and the citizens and troops we help support grows with us.

Proofpoint, Inc. helps the most successful companies in the world protect and govern their most sensitive business data. Proofpoint is an innovative security-as-a-service vendor that delivers data protection solutions that help organizations protect their data from attack and enable them to effectively meet the complex and evolving regulatory compliance and data governance mandates that have been spawned from highly publicized data breaches.

Proofpoint, positioned by Gartner in the Leaders Quadrant in its 2012 Magic Quadrant for Secure Email Gateways, delivers an integrated suite of on-demand data protection solutions spanning threat management, regulatory compliance, data governance and secure communications—all of which are based on a common security-as-a-service platform. Simply put, our solutions help organizations to:

Keep malicious content out of their environments
Prevent the theft or inadvertent loss of sensitive information
Collect, securely retain, govern and discover sensitive data for compliance and litigation support
Securely communicate and collaborate on sensitive data with customers, partners and suppliers
PTC, Inc. (Nasdaq: PTC) enables manufacturers and owner/operators like the DoD to achieve sustained product and service advantage in the age of the Internet of Things. The company’s technology solutions transform the way products are created and utilized across the entire lifecycle - from conception and design to sourcing and service.

PTC software platforms and best practices for implementation enable the digital assets associated with a physical product...electrical, mechanical, software, requirements, CAD files, repair procedures, spares, etc...to be created, stored and updated in one system, then accessed by support personnel who are servicing the equipment in the field.

The advantage for the private sector is competitive edge and efficiency, but this capability has also had a major impact on cost savings for acquisition and sustainment in the DoD. All told, PTC saves the DoD about $250M+ per year in direct cost savings. PTC has about 5,000 users in the Navy, 22,000 in the Army and 4,000 in Dept of Energy.

Founded in 1985, PTC employs over 6,000 professionals serving more than 27,000 businesses in rapidly-evolving, globally distributed manufacturing industries worldwide. Get more information at www.ptc.com.

Puppet, based in Portland, Oregon, develops automation software that frees IT professionals from mundane tasks, giving them time to develop innovative technology strategies that help their companies grow.

Flagship product Puppet Enterprise provides a quick and easy way for system administrators to manage computing, networking and storage needs, without having to know how to install packages, create users, mount filesystems, or change a user’s password on every operating system out there. Puppet Enterprise allows the sysadmin to concentrate on providing the resources a business needs, when it needs them.

Puppet Enterprise is based on open-source Puppet, a platform that has grown in popularity since it was first released in 2005. The Puppet Forge has more than 2,000 modules that answer the needs of sysadmins in companies from the Fortune 500 to small startups, across a wide range of industries.

Rally Software develops application lifecycle management software that helps software development teams collaborate and manage their projects.

LHS Productions, Inc. (“VideoBank”), is a software development and systems integration company located in Northvale, New Jersey. VideoBank specializes in turnkey systems designed to record (ingest and live capture), index, manage, search, retrieve and disseminate digital assets, especially video and related metadata using a combination of standard, web-based and touchscreen interfaces. VideoBank products include enterprise-level tools for live multi-stream capture, logging and distribution; integrated analytic tools for geospatial and temporal tracking of ISR platforms, and geo-referenced intelligence folders for collecting and disseminating information. VideoBank products combine industry standard hardware with patented custom-designed software to provide clients with modular, scalable and affordable digital asset management solutions. Systems range from economical small form factor laptops to enterprise class media data management centers.Beginning in 1997, VideoBank marketed its solutions to commercial end users with systems being provided to clients such as NASCAR, ESPN, the National Hockey League, DreamWorks, National Geographic and others. In 2006, VideoBank became a Department of Defense (DoD) contractor. The video workflows that were developed in the commercial sector were modified and refined to specific military workflows and mission scenarios including larger systems and customizations of the user interface (UI) to meet client specification. To date, VideoBank has provided systems to all major branches of the U.S. military: the Army, Navy, Air Force and Marines as well as other agencies. VideoBank has recently added a browser-based, low bandwidth, advanced interactive collaboration platform designed for users to share, collaborate, edit and annotate content for use in Government and commercial sectors.
