MEMORANDUM FOR DEFENSE INDUSTRIAL BASE

SUBJECT: Defense Industrial Base Essential Critical Infrastructure Workforce

The Defense Industrial Base (DIB) is identified as a Critical Infrastructure Sector by the Department of Homeland Security. The DIB sector is defined as the worldwide industrial complex that enables research and development as well as design, production, delivery, and maintenance of military weapons systems/software systems, subsystems, and components or parts, as well as purchased services to meet U.S. Military requirements. The attached Department of Homeland Security memorandum dated March 19, 2020, identifies the essential critical infrastructure workers during COVID-19 response emergency, and provides guidance to State and local officials as they work to protect their communities while ensuring continuity of functions critical to public health and safety as well as economic and national security.

Consistent with the President's guidelines: *"If you work in a critical infrastructure industry, as defined by the Department of Homeland Security, you have a special responsibility to maintain your normal work schedule."* The Essential Critical Infrastructure Workforce for the DIB includes workers who support the essential products and services required to meet national security commitments to the Federal Government and the U.S. Military. These individuals, include, but are not limited to, aerospace; mechanical and software engineers; manufacturing/production workers; IT support; security staff; security personnel; intelligence support, aircraft and weapon systems mechanics and maintainers; suppliers of medical supplies and pharmaceuticals, and critical transportation. These include personnel working for companies, and their subcontractors, who perform under contract to the Department of Defense providing materials and services to the Department of Defense and government-owned/contractor-operated and government-owned/government-operated facilities.

Companies aligned with the essential critical infrastructure workforce definition are expected to maintain their normal work schedules. Everyone should follow guidance from the Centers for Disease Control and Prevention as well as State and local government officials regarding strategies to limit disease spread. If your contract or subcontract supports the development, production, testing, fielding, or sustainment of our weapon systems/software systems, or the infrastructure to support those activities, are considered Essential Critical Infrastructure. If your efforts support manning, training, equipping, deploying, or supporting our military forces, your work is considered Essential Critical Infrastructure. If you are performing such tasks as providing office supplies, recreational support, or lawn care, they are not considered part of the Essential Critical Infrastructure Workforce. We will continue to assess the conditions as the COVID-19 situation evolves.
