SUBJECT: USACE Sacramento District COVID-19 Posture

Adam Hyman
Immixtechnology, Inc.
8444 Westpark Dr, Ste 200
McLean, Virginia 22102-5112

Dear Mr. Hyman:

In the past month the world has changed because of the COVID-19 pandemic. Across the country, the U.S. Army Corps of Engineers (USACE) is supporting FEMA – in coordination with federal, state, local, and tribal partners – to synchronize the interagency response. USACE is planning, assessing, designing, and constructing alternate care facilities across the US. This is truly a monumental challenge.

While our district is joining the rest of USACE in working hard to address this pandemic, we at Sacramento District are also focused on delivering quality projects across our business lines. Together we are revolutionizing construction practices through creative thinking, responsible behavior, innovative engineering, and disciplined actions. However, our combined efforts have the potential to be significantly affected if we fail to implement prudent actions to combat the COVID-19 virus.

People are our most valuable resource, and taking care of them is absolutely our most important job. In the Sacramento District, we have been taking and will continue to take aggressive measures to protect our workforce. These include maximizing the use of telework and teleconferencing, social distancing through spacing, limiting meeting attendees, and diligently cleaning public and personal areas. We also regularly share CDC messages so that appropriate practices are followed.

I urge you to employ meticulous efforts to protect your workforce as well. My team has relayed that many of you have updated your Accident Prevention Plans to enhance the safety and health of your employees – outstanding! Please continue to observe all CDC, federal, state, and local guidelines to fight this virus. If you have any questions or concerns, please contact your contracting officer. The Sacramento District team is committed to working alongside you until this pandemic is subdued.

Thank you for your dedication and commitment to partnering with us. I encourage you to be safe, and lead with compassion and empathy for your employees and Americans depending on and expecting us to deliver.

Sincerely,
