Eight Advantages of OnRAMP for FedRAMP Authorization

Get your product FedRAMP authorized and to the market faster

When you are ready to pursue FedRAMP authorization, there is a faster and easier way that can save you time and money vs. doing it yourself or outsourcing to multiple consultants. OnRAMP is an all-inclusive turnkey program that streamlines the authorization process and accelerates your journey to FedRAMP compliance. OnRAMP will expedite what can otherwise be a long, expensive and complicated process.

With OnRAMP, you leverage a one-stop-shop of highly-regarded experts, hosting and compliance services. The OnRAMP team acts on your behalf to complete every component of the process, from initial planning and evaluation through delivery of your FedRAMP-authorized SaaS applications via government contracts and channel partners.

Through OnRAMP you gain access to all the hosting, compliance expertise, technical resources and route-to-market assistance you need, all in one package, so you can get to the FedRAMP Marketplace faster, at a much lower cost and with dramatically reduced complexity and risk.

OnRAMP is available to you through immixGroup, a leading value-added federal IT distributor that helps technology companies grow their public sector business. The OnRAMP team includes highly experienced, leading technology companies in security: ORock Technologies, Coalfire and Schellman and Company.

The Advantages of OnRAMP for FedRAMP

GOVERNMENT SPONSORSHIP
OnRAMP's team of experts will guide both you and your government customers through the sponsorship process.

PROJECT MANAGEMENT
Designated project managers control the process from start to finish, managing all meetings and communications and submitting all necessary documentation.

COMPLIANT CLOUD HOSTING ENVIRONMENT
Your application is hosted in ORock's secure, compliant, open source cloud environment, authorized at the FedRAMP Moderate level. You'll inherit 80 percent of the controls your application will need, which speeds up the process significantly.

TRAINED PERSONNEL
The OnRAMP team includes ORock's in-house experts (compliance analysts, solution architects, NOC and SOC specialists) who will collaborate with your engineers from the start of the project through completion of the authorization process and beyond.

CONTROLS & DOCUMENTATION
Our security experts write your SSP and manage all documentation on an ongoing basis. Coalfire then gives the SSP a comprehensive review.

ASSESSMENT BY A 3PAO
Schellman and Company reviews your SSP on behalf of the government. Assessment services are included within the program cost of OnRAMP at a fixed price.

SAAS APPLICATION MANAGEMENT
The OnRAMP program provides US-based engineers and security specialists from ORock to manage and maintain your SaaS applications in ORockCloud. NOC and SOC analysts help manage the underlying cloud infrastructure and network so you don't have to.

CONTINUOUS MONITORING
Trained security and compliance experts continuously monitor your environment and submit monthly reports to the sponsor and the FedRAMP PMO. They also address any findings required to maintain compliance and coordinate with your engineers as needed.

FedRAMP

By getting listed on the FedRAMP Marketplace, you can help your government customers meet their FedRAMP security mandates, save money and migrate to the cloud while growing your public sector business. It can be a long and risky road, but you don't have to travel it alone. Partnering with a team of experts through programs such as OnRAMP allows you to achieve authorization faster and at a fraction of the cost. The result is a streamlined, simple, and lower-cost road to FedRAMP authorization.
