

How immixGroup Can Help With Current Challenges

Our team of experts is ready to help assist your government customers quickly acquire the solutions they need to address their urgent technology requirements during these unprecedented times.

Through the Region 4 ESC contract, available through OMNIA Partners, Public Sector, we can:

- Help ensure the continuity of operations and delivery of essential government services
- Help ensure the usability and integrity of the network backbone and secure connectivity via virtual private networks
- Allow public sector institutions to continue to operate in a virtual format
- Help government protect their data against unauthorized or unwanted use during emergency operations

Additionally, our flexible capital solutions can help bridge funding gaps.

The following vendors are available on immixGroup Region 4 ESC contract:

	<p>Citrix and immixGroup have the solutions and resources to help government IT professionals support employees working remotely.</p>
	<p>Metallic, a division of Commvault brings you powerful, enterprise-grade backup and recovery technology through simple SaaS delivery.</p>
	<p>SmartBear solutions allow software developers to plan, build, test and release software faster and were built to be used by distributed software delivery teams of all technical skill levels.</p>
	<p>Palo Alto Networks can help government agencies quickly and securely scale to accommodate remote users. View this webinar to learn more about Palo Alto Networks' Federal Trusted Remote User Support System offering.</p>
	<p>To help government agencies facing increased cyber risks caused by challenged visibility into the remote workforce, Tenable is offering short-term surge licensing options through June 15.</p>
